

Our Products and Services

Security Innovations offers a full range of security products and services for both residential and business needs. We are a full service provider with system design capability, installation, repair, system monitoring and reporting.

Our products and services include:

- 24/7 monitoring and response with U.L. listed monitoring station. In the event of an unauthorized entry, smoke detection, water level detection or medical emergency, our monitoring station is notified and the appropriate authorities are immediately dispatched.
- State-of-the-art name brand security equipment (i.e. motion sensors, door/window contacts, control panel, sirens, video cameras, etc.)
- Fire/smoke detection
- Flood detection
- Medical emergency notification systems
- Video surveillance equipment & recording devices including motion tracking and remote viewing options and control options
- Key card access control with customized reporting

What makes us different?

We believe that there are several important factors that separate Security Innovations from other security providers. For starters, we are locally owned and operated and we make it a point to understand our customers and their needs. Your system will be designed, installed and serviced by local and knowledgeable professionals. We care about our community and keeping it safe.

We save you money. We have exceptional experience in security systems and we will be able to design a system to meet your needs at a cost for every budget. This is accomplished through expert system design and local installation capabilities. In addition, we are able to provide leased equipment options that mean no up-front equipment cost to you.

Security Innovations uses the highest quality name-brand equipment and carefully scrutinized and selected U.L. listed monitoring stations to provide fast and reliable response 24 hours/7 days per week in the event of an emergency. We believe that your peace-of-mind is our business and we want you to know that you can trust Security Innovations to provide it to you.

We are a full service provider that can handle any size project. We are capable of providing the basic residential security package systems as well as very complex large commercial applications with keycard access, monitoring and video surveillance with motion tracking and remote access. Security Innovations knowledgeable staff will be able to design a system to meet your needs.

At Security Innovations, our commitment to our customers doesn't end after the sale. Security Innovations utilizes our talented local technicians to keep your system working year after year by providing rapid response and service plans to ensure your systems stays working and maintained.

Why consider a security system?

There many reasons to consider a security system for your home or business:

1. The most obvious is to protect your family and your valuables. Unfortunately, crime is part of every society and security systems have been proven to decrease your chances for a break-in. This can provide peace-of-mind while you are sleeping or away from your home or business.

The effectiveness of security systems have been demonstrated in numerous studies:

- Rutgers University recently released a study, using five years of data, which scientifically proved that burglars tend to avoid homes with alarm systems. *Source: NBFAA*

- The FBI reports that a home is burglarized every 15 seconds in the U.S. and crimes to property, like homes, represent over 75 percent of all crimes reported. *Source: NBFAA*
- According to a Temple University study, a monitored alarm system makes a home three times less likely to be burglarized versus a home without an alarm.

Source: NBFAA

- Businesses without alarm systems are 4.5 times more likely to be burglarized than those with electronic security in place. *Source: An Academic Study of Home and Business Security, Temple University Department of Economics Simon Hakim and Andrew Buck, 1992. 2*

2. Installing a security system in your home or business can save you up to 20% on your homeowners or liability insurance!
3. In addition, Security Innovations systems can provide assistance during other urgent situations that are not crime related.* Our systems can provide alarms and notify authorities in the event of fire, flooding and medical emergencies. This can often be the difference in saving a life or preventing the destruction of valuable property.

**Requires phone line and monitoring service agreement.*

4. For business customers, Security Innovations can provide unique keycard access systems that will allow you to track all entry and exit events from you facilities. In addition, we can provide video surveillance systems that will record and store all activity in and around your facilities and allow you to monitor and control the video cameras remotely. This can provide valuable information in the event of a workplace incident or theft.

Who is Security Innovations?

Security Innovations is a locally owned and operated security company that understands the needs of our customers. Unlike the national mega-chain security providers that are impersonal and treat you like a number, our local sales representatives, service technicians and installers will work with you to understand your needs and provide the peace of mind that you deserve. Security Innovations offers over 75 years of security experience within our company and it's all at your disposal with a simple phone call. Our experience and knowledge of the security industry means that we are continually monitoring the latest security technology and offer our customers the very best state-of-the-art security systems and options. The best part is that we are able to do this without charging as much as most of the national mega-chain providers. That's how Security Innovations keeps you safe at home and office without breaking the bank!
