

Real-Time, Remote Video Surveillance Monitoring

Are You Getting The Most From Your Video Surveillance System?

Armed robbery and theft from pharmacies is a rapidly growing trend in today's uncertain economic climate. You know your business can benefit from security, but your overhead and inventory cost are already high as it is. Hiring a single security guard or loss prevention officer is too costly (and only guarantees 30-40 hours a week of protection). A video surveillance network, integrated with an alarm system, is the most effective security solution available, but only if use it to its fullest capacity – with real-time, interactive monitoring.

Security Innovations offers affordable, active 24/7 security for your retail business. We can provide you with a custom-designed security solution and monitor your pharmacy at a fraction of the cost compared with hiring security personnel. Whether your business is a small independent pharmacy, or a large chain, you'll get state-of-the-art security coverage without outrageous costs. That's real value investment.

About Us:

Security Innovations provides advance video monitoring solutions to help protect business, residences and the people who live and work in them. We provide a real-time, interactive monitoring solution that can easily integrate with any existing or new video surveillance network. Our systems are run on an advanced software platform, delivering a single point of alarm management and control for video surveillance, burglar and access control. A secure access portal via our website allows customers to manage and monitor their accounts and view activity reports online from any remote location, on any internet connected device.

PHARMACY
